## What's the difference between a Lunch Jar and a Food Jar?

**Lunch jars** come with multiple plastic inner bowls that fit inside a vacuum insulated outer container. The inner containers allow you to compartmentalize your food and bring an entire meal, like a pasta dish, soup, salad and cookies in each separate bowl. To see which lunch jar comes with which bowl, please see page 1. All lunch jars feature Zojirushi's high-tech vacuum insulation to keep contents hot or cold.

SL-JAE14 Model

**Food jars** don't have inner bowls, but works more like a vacuum insulated mug. You put your food directly into the vacuum insulated container, and you eat (or drink) directly out of it. Although this doesn't allow you to take different types of food in one container like a lunch jar, the 18/8 stainless steel interior won't stain and is neutral to taste and smell. It's also less clean-up for you!

### SlickSteel™ Finish

Durable and sanitary 18/8 stainless steel interior with SlickSteel™ finish resists corrosion and repels stains.

### Lid with Gasket

Tight-fitted lid with gasket seals tightly to minimize leaks and maximize heat retention. Pressure release valve to release pressure and make the lid easier to open.

### Wide Opening

2-1/2" wide opening makes the food jar easy to fill and clean, and allows you to eat directly out of the jar.

### Compact Design

Compact design takes minimal space while maximizing capacity.

### Hot or Cold

Good for hot meals, soups, oatmeal, cold desserts, beverages and much more.

## Vacuum Insulation: How does it keep food hot?

The air between two thin layers of stainless steel that make up the outer container is removed to create a vacuum. Because there is no air, the temperature on the other side of the wall does not transfer over, keeping foods hot or cold for hours.

## The Story About Zojirushi:

Zojirushi (pronounced 'zoh-jee-ROO-shee') began in Japan in 1918 as a manufacturer of hand-blown vacuum bottles. Today, Zojirushi's product line extends to high-end small appliances such as rice cookers, breadmakers and coffee makers, high quality vacuum insulated products like vacuum bottles, lunch jars and carafes, and commercial restaurant and coffee equipment. The name Zojirushi means "Elephant brand" in Japanese.
